THE DIGITAL NEWSPAPER

The lost Doctor Who comes back alive

A meassage from mars

BFI show first British SF film free on BFI YOUTUBE channel

----- D.ANDERSON

can see what they mean by mars version of Christmas carol has the alien from another world teach a man earthly to be good to their fellow man not be selfish and do things for others by himself not force too. I love new sound effects that give life to this silent movie bring magic to this 100-year-old restored done amazing good job of first British SF film had not been seen since 1913

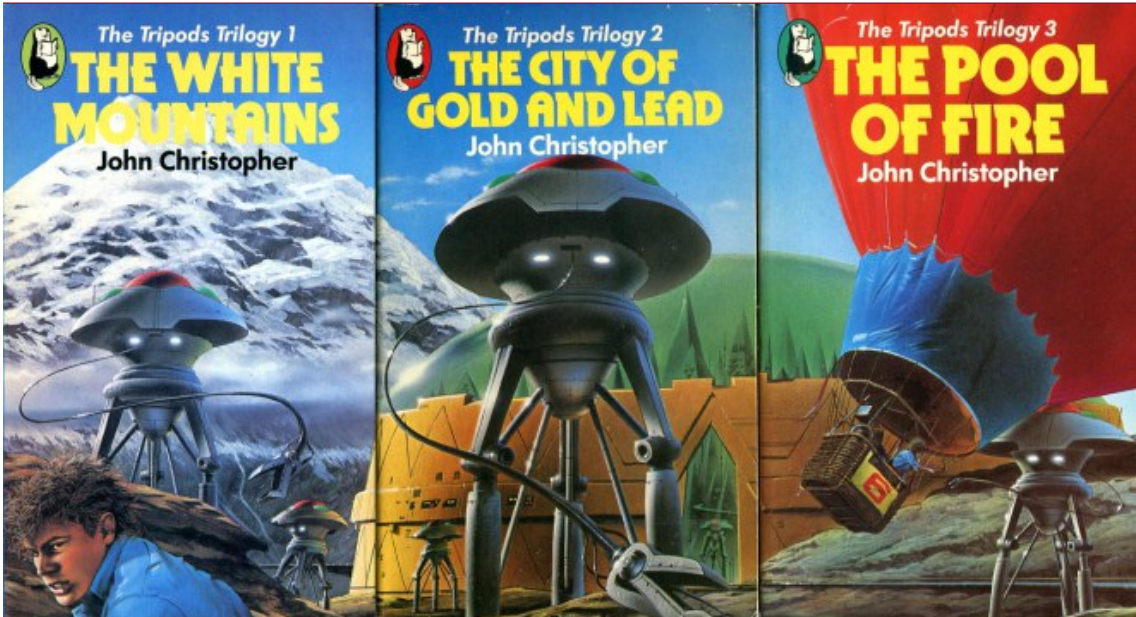

The Faceless Ones Review

----- DAZ ANDERSON

Last year I heard the audio book the faceless which i enjoyed the first time my thoughts of the book can be found the link below the page, anyway the animated DVD came out this week a chilling body snatch story a good script and strong characters also nice to see humor from the doctor , the animation wonderful bright with life by turn this black white show in to colour to this lost classic doctor brought back to life from 1967 .We see adventure to feature Ben and Polly return home same day the war machines also see doctor be fair to-aliens make a truths in a peaceful with out blowing things up also ends with cliffhanger that will carry on the next adventure where doctor wants to find out who has taken his Tardis hear evil of the daleks.

One the best lost doctor who stories make you wish the full story existed after you hear the audio book. like lot target who books they put more than you can see onscreen from the pictures of the comediennes come across the scariest lost doctor monsters of lost doctor who which played with every day things to make them scary for the reader as TERRANCE DICKS amazing job translate it the page feel the pictures come to alive also understand plot also rare change were second doctor try use peace talks rather than blow up there ship as he knows it is right thing to as they are dying race even some of the of the aliens choice wrong way about things 10/10

The TRIPODS book series begin in 1967

The Tripods

The Classic Reviws

----- D. ANDERSON

Way John Christopher wrights the TRIPODS trilogy like H, G Wells meets John Wyndham a diffident kind take on WAR OF WORLDS where the aliens have taken over world a 100 years ago by capping people at age 14 a boy Will plans to leave before next capping day because of his brother Jack not same person as before and starts a journey with Henny and makes friends with Beanpole from France to get to white mountains to find the freemen and hope to defeat the tripods. Really catch this world jumps of the page at first start to think it is set in the past,

The BBC TV did a faithful dramatized version with small diffidence’s to the book and given extra danger to it but just as the series was doing well, they decide to pull plug before start to do the third series which was shame a DVD has music for third series in the features and look back on the show feature too there was talk of film but nothing came of it, worth watch and read

Rated 10/10

DOOMWATCH

The Plastic eaters

----- D. ANDERSON

this classic comes cross most believable sf shows to come out the 1970,s that were created by kit peddler and Gerry Davis who came up with the cybermen from doctor who well kit was into entertainment dangers to the planet amaze by what things come true from the show with plastic research has hit news last week of melting plastic waste the episode got be edge of your seat even you know what's going to happen saying don't open it, I knew about doom watch from 1972 film and only 4 episodes came out on VHS in 1990,s that i have seen or few episodes on UK gold TV in the early 1990,s only thing amazed me how long it taken see full series to come out on DVD

The 8th Doctor Audio Adventures

SEASON 1 Reviw

----- DAZ ANDERSON

May not fan of doctor who tv movie but other things could have done with it to make it better never mind about that, Big Finish give Paul McGann a second chance to play the eighth

Doctor to bring him alive and treat the audio adventures like a second pilot episode, they taken best bits of classic Doctor who to make the series too make it work and add something new to it. Big finish show having companions of diffident time works but strange since doctor who return to the tv screens all companion are from present day well top companions are from past like Jamie, Charlie comes across an adventure girl from 1929 first encounter doctor on the airship R 101 change their lives forever.

Charlotte Elspeth Pollard, or simply Charley, is a fictional character played by India Fisher in a series of audio plays produced by Big Finish Productions, many of which were broadcast on BBC Radio 7, based on the long-running British science fiction television series Doctor Who. Can see why there was love for this Doctor just bad luck Paul McGann came at wrong time for a great actor

LAD A yorshire story

A teenage boy forms a friendship with a park ranger in the Yorkshire Dales after the death of his father.

EN

Director: Dan Hartley

Writer: Dan Hartley

Stars: Bretten Lord, Nancy Clarkson, Liam Thomas |

The film was made in 2011 with a cast of newcomers and help from the community soon after Hartley had left film school. With a few short films already under his belt and an abandoned career in the law behind him, he noticed all the producers he met were especially drawn to his idea of telling the story of a friendship between a park ranger and young teenage boy in danger of losing his way in the world. This low budget film finally gets noted on YouTube and amazon as it had trouble get cinema screening at time. Rating full marks
